Find duplicate files, delete duplicate files, remove duplicate files , remove duplicate files with photos, remove duplicate files with photos and office documents - all is possible with this automatic duplicate file remover.

Here are some short reviews, sent to us by people, who already use Remove Duplicate Photos:"On our photo studio, as on any other, is stored a large amount of photo files. Some of them are used regularly, some of them not. To find needed photo file in our photo archive, where are stored thousands of photo files, is very hard. We had to hire a special employee, who categorized files in archive, but even such solvation was not perfect - we periodically received several thousands of files in a day, and a person who organized them, could not sort and organize them all and made a lot of errors. All this unsorted photo files collected, collected and collected... One day while real-time broadcasting photos clips, prepared to transmission, were lost in all this chaos, and we were forced to break transmission. My colleague from another photo studio called me, when knew about incident, and advised to use Remove Duplicate Photos. Over several hours all our thousands of photos's were sorted and organized and even if we are gathering several hundreds of new images every day, Remove Duplicate Photos easily append them to common photo collection - right from photo CD's! Thanks very much to all Remove Duplicate Photos developers. photo file sorter, that they made, really help people."

Evan Willard, chief designer of design studio "Colors of Colorado" "At April issue of "My Computer" magazine I read that Remove Duplicate Photos - is the easiest and most user-friendly way to sort, rename and organize photo files. I have large photo file collection on my computer. Several first years it was easy to maintain it, but now, when I periodically download variety of photo files from Internet it became very hard to find something in my photo collection. I did not know what to do - variety of folders and in every of them are picture and photo files those I even never seen. I even wanted to stop collecting of photo files, but suddenly come in mind that article - and I downloaded and started Remove Duplicate Photos. It was like a miracle - all my photo files were sorted, renamed, organized automatically, exactly as I wanted. Really useful photo file sorter - It is needed for everyone who has photo files and wants them to be in ideal order."

Christopher Garvin, photo collector "In our office periodically is collected variety of documents in electronic form - they are needed for statistics gathering. Every Friday i create consolidated report, based on information, gathered from them. Day by day, month by month office documents collected on our file server, their quantity increased and increased, and to work with them became harder and harder. One Friday i could not find one document, needed for weekly report, and spent weekends in the office, sorting all documents by author and department, where they were created. Already was Monday, but report was still was not ready. Engineers from technical department installed, to help me, a special program for files organizing. It sorted all documents in minutes, directly as I want - first part by date, second part by size, and third part by author. Needed documents were found and from that time my work became much easier - Thanks a lot to Remove Duplicate Photos creators team."

Michael Werner, office manager

"I am working in archive department of large production company. On our servers most of documents are stored in archived state. We receive them daily and we needed, before appending to common storage, manually open every archive file, view it's content and sort it, according to documents, located in it. All was OK, but after extending of company production level we became to get more and more archived documents for processing. Finally, leaving on the work until late at night. To solve this problem was installed Remove Duplicate Photos and now it do all itself. Very powerful program - how we could be without it?"

Nikolas Flatley, director of archive department in production company

"Our department store all non-private files, transmitted over satellite network. Every day we receive millions of new files. All this data must be somehow organized, so any of our clients could easily find among that files what he need. We tried all file organizing tools, presented on market - and chosen Remove Duplicate Photos. Why? Extremely flexible settings. We set up different processing rules for photo, video, text, executable files and archives. No one other program can do it today. "

Victor Acosta, chief engineer of data processing center That's what users say about Remove Duplicate Photos. We hope, that it will be useful for you too. There are also presented other user reviews, not listed here:
